Bigfoot CE Shoe Cover Hazmat Boots

BigFoot CE shoe cover is our third design from the original HighTop Hazmat Boot.

The BigFoot CE shoe cover is designed for environmental cleanup projects, chemical protection, and many other industrial applications.

Our shoe covers surpass the physical requirements of general industrial use. Each shoe cover provides a superior barrier against dermal contamination because they are resistant to abrasions, chemical attacks, punctures, and snags.

Each rubber shoe cover is made from 100% natural [Latex Shoe Cover](#) rubber and uses a contoured rubber sole design.

Our BigFoot CE shoe cover's are:

Manufactured with a powder-free process

Made with high-density, natural latex rubber

Contoured Rubber sole design

Made in Mexico

100% inspected

PacPoly Rubber Shoe Covers

PacPoly rubber shoe covers protect better and last longer than other protective shoe covers.

Our [Shoe Covers For Food Processing](#) surpass the physical requirements of general industrial use. As a result of their superior resistance to abrasion, chemical attack, cuts, punctures and snags, our rubber shoe covers provide a reliable barrier against dermal contamination.

Each shoe cover is made from 100% natural latex rubber and has a molded tread design which offers excellent slip resistance in wet and dry applications.

PacPoly Rubber Shoe Covers are designed specifically for use in food processing plant operations, clean-ups, and in the processing of materials for shipping. PACPOLY shoe covers are a high-end solution for contamination protection, safety and reliability.

Our shoecovers are:

Made in the U.S.A.

100% inspected

Made with high-density, natural latex rubber

Manufactured with a powder-free process

Abrasion and Puncture Resistant

Have a molded tread design

Blue Nitrile Gloves

Our Blue [Nitrile Gloves Manufacturers](#) are cut resistant and disposable.

Each nitrile glove has an embossed diamond pattern on the external surface area. This diamond grip texture provides firm and reliable grip in both wet and dry applications.

Our Blue Nitrile Gloves are crafted with contoured fingers and palms. This design gives you the highest levels of flexibility, comfort, and dexterity. Each disposable glove is latex free and powder free — reducing the transfer of allergens to the skin.

Our disposable gloves offer superior snag, puncture, and abrasion protection over rubber or neoprene gloves. Each glove is suitable for heavy-duty cleaning applications.

Our Nitrile Gloves are commonly used in these industries:

- Automotive Food Processing / Manufacturing plants
- Janitorial / Sanitation
- General Industry
- Military
