# *About us*

Shagun Enterprise made a significant advancement in 2022 by introducing DTF (Direct to Film) machines, which received a positive response from our customers. Based on valuable customer feedback and market demand, we launched several advanced products in the sublimation segment, including 12 and 16 print head models. In the Direct on Fabric segment, we also introduced the 16-head Ricoh Gen-6 printer. Compared to 2022, we have exceeded our targets by three times, thanks to the support of our loyal customers, distributors, and dedicated staff. After achieving success in Gujarat, we expanded to Delhi, Punjab, Haryana, West Bengal, Maharashtra, and Tamil Nadu, and are now planning for PAN India expansion.
